

PowerWrap[®] ANKLE BRACE

WITH THE EXCLUSIVE
POSITIVE TENSIONING SYSTEM

- A quick pull of the positive tensioning system gives you a perfect fit and instant support without the need to tie laces.
- Easy to wear and adjust.
- Helps prevent injury.
- Great for sports, home or anytime you need extra support.

Positive Tensioning System

Our exclusive positive tensioning system provides customized support and comfort without the need to tie laces. The benefits of laces are incorporated into two sets of easy-to-adjust tabs. The larger set of tabs is used to fit the brace to your ankle. The smaller set adjusts the brace to the fit and support you need. This system provides a "personalized fit" every time.

Patent #6,540,705

Comfortable Design

We use a flannel-backed canvas shell for durability and comfort. A unique center wedge allows greater flexion and extension while maintaining proper support. Flexible elastic on the back of the heel provides a comfortable, soft fit over the Achilles Tendon. A seamless bottom adds comfort.

Easy to Use

Without laces to tie, this brace is easy to put on and comfortable to wear. It supplements the ankle's muscles and ligaments. It can be used for weak or tired ankles, and aids in the prevention

of ankle injury. It also is ideal for pre- and post-cast situations, opening completely for easy removal. It is ideal for sports, work or home.

Specifications

Product number

- #6350

Packaging

- Clamshell with color insert

Package Dimensions

- 6" x 9.5" x 1.75"
(15 cm x 24 cm x 4.5 cm)

Weight
